EDRS Price MF-~~$1.25~~ HC-$11.80

Descriptors-*COLLEGE CURRICULUM, *COMPARATIVE ANALYSIS, *CURRICULUM EVALUATION, *JUNIOR COLLEGES

Identifiers-Kansas City, *Missouri

The purposes of this study were (1) to list courses and to note curriculum trends in six areas of study, (2) to comment on the nature of these trends, and (3) to discover in which areas Metropolitan Junior College (Missouri) is lacking. Materials of interest to counselors, admissions directors, and administrators are included. The information was taken from the catalogs of 140 junior colleges with an enrollment of more than 1,500. Course listings are shown in six main categories: (1) humanities, (2) social sciences, (3) biological sciences, (4) physical sciences, (5) business, and (6) technical and vocational. A chart-guide of the sub-divisions within each category is provided for the reader's convenience. Metropolitan Junior College offerings compared favorably with other colleges in the humanities, social sciences, natural sciences, and mathematics. It excelled in the biological sciences, but was lacking in its business course offerings. (HH)

PLANNING & RESEARCH

KANSAS CITY, MISSOURI

APRIL 1968

[JUNE 1968]

Participating in this catalog study were Pat Pearson, Chris Zahner, Sally Rumsey, Jane Young, Judy Snowder, and Regina Tolbert--all students. In addition, Mary Newton and Joyce Omer, secretaries, rendered invaluable assistance. Robert Barnard undertook the cumbersome task of running off more than 300 stencils. Without the help of this team, the study would not have been brought to fruition. Also, a debt of gratitude is owed the registrars and officers of admissions who mailed to MJC their 1967-68 or 1968-69 catalogs, the material basis for this study.

COURSE OFFERINGS IN LARGER JUNIOR/COMMUNITY COLLEGES - A COMPARATIVE STUDY

INTRODUCTION

The problem herein is to attempt to determine what courses other large junior/community colleges offer which we do not offer. In addition, some general information regarding the campuses, degrees offered, requirements for degrees, student load, costs, divisions, grading systems, and the nature of developmental or remedial offerings are to be considered.

The purposes of the study are: 1) to list courses and note curriculum trends in six broad areas of study, 2) to comment on the nature of these trends, and 3) to indicate wherein Metropolitan Junior College is lacking. As an addendum, supplementary materials of interest to counselors, admissions directors, and administrators are included as guidelines for future direction.

For purposes of convenience and economy, the study is based on materials taken from the catalogs of 140 junior/community colleges with enrollments in excess of 1,500 students by head count. These

are included as guidelines for future direction.

For purposes of convenience and economy, the study is based on materials taken from the catalogs of 140 junior/community colleges with enrollments in excess of 1,500 students by head count. These institutions were selected from the 1967 Directory of the American Association of Junior Colleges. A similar, but less detailed, study was made in 1963. For the most part, the list includes public institutions although some of the larger private institutions are included. Students, helping in the project, had planned briefings in what to look for.

Any study based solely on information acquired from college catalogs is, of course, limited and not totally reliable. Some colleges may list courses which are taught every second year; some courses may be listed but not taught at all if students fail to demand them. Notwithstanding, the number of such non-taught courses is comparatively small because, primarily, the institutions selected had enrollments sufficiently large to fill curricular offerings each year or each part of a school year. Occasionally, an institution will "pad" its offerings by listing many courses for which there is no demand. This is done in the hope of attracting students and

obtaining additional financial support, but this practice, once common, particularly in the smaller institutions, now is seldom used.

The use of catalogs to examine pertinent data and curricular offerings is today a valid source of information and worthy of study when the researcher has nothing more in mind than listing what is found. This presentation makes no effort to diagnose or analyze content or syllabi, to determine quality, or to inquire if similar course content could not be more efficiently combined in fewer offerings. It does only what it set out to do: To list course offerings and additional pertinent materials which are not offered by us or which may be compared with what we offer.

In order to do this, the researcher and his student assistants had to: 1) determine whether courses with different names were the same as our own, 2) decide in which of the divisions the courses should be placed, 3) attempt to determine whether our more comprehensive courses included the same content as a number of their individual and specific courses. Deciding in which of the divisions courses should be placed presented the most difficulty because various institutions placed the same course under a number of different divisions; viz., Human Relations, which was placed by some under I) humanities, II) social sciences, V) business, or VI) tech-

hensive courses included the same content as a number of their individual and specific courses. Deciding in which of the divisions courses should be placed presented the most difficulty because various institutions placed the same course under a number of different divisions; viz., Human Relations, which was placed by some under I) humanities, II) social sciences, V) business, or VI) technology and vocational divisions. Art and Music strayed from humanities to vocational and technical, and Education appeared under humanities, social sciences, and vocational-technical in the different catalogs under scrutiny.

For purposes of convenience, course listings are separated into six main divisions: I) The Humanities and Related Fields, II) Social Sciences and Related Fields, III) Biological Sciences and Related Fields, IV) Physical Sciences and Related Fields, V) Business and Related Fields, and VI) Technical and Vocational Subjects. Chart I, "Curricular Divisions," should help the reader find his way as he thumbs through different offerings of the various schools. (see p. 9)

Despite the chart-guide, some courses were placed in the wrong categories, but this has no material effect on the study. Whether Electronics or Metallurgy should be listed under division IV (Engineering) or division VI (Technical-Vocational) or whether Journalism appears under division I (Humanities) or division VI

is of little consequence. The primary purpose is to discover what other institutions offer which MJC does not offer.

One question raised during the study deals with curricular obsolescence. The principal concern is whether courses offered in 1967-68 will have been changed by the time the study is issued in the summer of 1968. This argument is invalid. It is true that dynamic institutions are evaluating curricula periodically, but no staunch institution so alters its offering in the course of a year as to change it substantially, completely, or even radically.

GENERAL STATEMENTS OF COMPARISON

The statement made in the 1964 study may be repeated: What Metropolitan Junior College of Kansas City does, it does well. But compared generally with the other large junior/community colleges of the nation, it doesn't do enough.

Several concrete examples may be cited of courses listed in a majority of the institutions' catalogs.

I. Humanities:

Journalism	72%
Sculpture and/or Ceramics	71%
Creative Writing	56%
Acting and Theater Arts	42%
Radio and TV Announcing	32%

majority of the institutions' catalogs.

I. Humanities:

Journalism	72%
Sculpture and/or Ceramics	71%
Creative Writing	56%
Acting and Theater Arts	42%
Radio and TV Announcing	32%
Argument and Debate	26%
Piano, Vocal, and Instrumental Music	26%
Shakespeare	23%

In addition to this list may be added such courses as silk screen painting, jewelry design, hobbies and crafts, motion picture photography, photography and color photography, calligraphy; colloquia, lapidary, art for elementary teachers; comparative religion and the philosophy of religion; opera workshop, organ, music for elementary teachers, ensemble.

While some critics may argue that many of the separate courses are included in broader and more comprehensive offerings at MJC, it may be worth noting that some schools are highly specialized, even though every course may not be offered each term. The American River Community College of Sacramento, California offers 43 different courses in Music! Casper, Wyoming offers 18 courses in Music, and Cabrillo of California lists 16 such courses. None of these colleges enroll as many students as MJC.

II. Social Sciences:

Marriage and Family	48%
Social Problems, Urban Affairs, Social Welfare	28%

History of Eastern Asia or the Far East	26%
History of Russia or the Soviet Union	16%
Courses in education	14%
Human Relations	14%

Other courses are Latin American and African history, history of the Middle East, a history of world affairs, English history, model United Nations study, as many as five courses in anthropology; social welfare, practice in interviewing; political parties and pressure groups, man's cultural heritage; labor problems and industrial relations, and a bevy of courses under the general heading of psychology.

The courses listed under psychology are:

Applied Psychology
Social Psychology
The Psychology of Adolescence
Psychology of the Exceptional Child
Business and Industrial Psychology
How to Study
Educational Psychology
Abnormal Psychology
Deviate Behavior
Leadership Training
Activity Therapy
Race Relations
Mental Health
Self Development
Human Relations
Social Welfare
Nursery School, Principles & Practice
Reading Techniques
Career Planning

In this discipline alone, it was not uncommon to find six to ten courses listed. On the surface, it would indicate the use of imagination and the adaptation of curriculum to student and community needs. Certainly, no restraining influence, such as the state university, was felt by any of the curriculum makers who were responsible for such rich and varied attractions, but depth, content, and mastery are other matters for consideration.

imagination and the adaptation of curriculum to student and community needs. Certainly, no restraining influence, such as the state university, was felt by any of the curriculum makers who were responsible for such rich and varied attractions, but depth, content, and mastery are other matters for consideration.

III. Biological Sciences

Few institutions offered more than Metropolitan Junior College in this discipline. Actually, MJC strength is, perhaps, greatest in this area or it has been neglected in other schools. Column III is usually a blank one and some items listed such as microbiology or bacteriology are offered by MJC.

Many institutions offer botany including such courses as plant morphology and several offer parasitology, histology, embryology, and pharmacology. Forestry was listed in several institutions' catalogs and one course offered by Casper JC (Wyoming) seems unique: "432106--"Medical Self Help Methodology" which may or may not have been a fancy name for First Aid. Cabrillo JC of California listed 12 courses in field biology and 3 in marine biology and one college listed: Life Science, California Animals and Plants, Medical Terminology, Evolution, Food Microbiology, Pathogenic Microbiology, Microbiology of Water and Dairy Products. "Medical Terminology" appeared

in many catalogs as did "Pharmacology" which usually accompanied courses in nursing and health service education.

IV. Natural Sciences and Mathematics

Metropolitan Junior College holds its own in this area although a few schools had such courses as bio-chemistry, industrial chemistry, chemistry for cosmetology; archaeology, invertebrae paleoantology, mineralogy, geomorphology, petroleum geology, and cultural geography. For some reason, student researchers listed Agriculture in area IV, probably because it was so listed in some of the catalogs; viz., soil chemistry.

In mathematics a few schools listed such courses as stoichiometry, symbolic logic, finite mathematics, and there were several institutions which listed special courses in electrical, mining, and/or petroleum engineering. Blackhawk lists, for example, "Elementary Mechanics of Deformable Bodies."

Our weakness begins to show in area V, Business. In reality, it is not a weakness; just a paucity of offerings. Although our Business Division is well established and does an excellent job within its limits, the fact is most other junior/community colleges--especially those in California and Illinois--offer a great deal more.

Business Division is well established and does an excellent job within its limits, the fact is most other junior/community colleges--especially those in California and Illinois--offer a great deal more. For example:

V. Business

Salesmanship	72%
Management	71%
Advertising	68%
Marketing, merchandising, retailing	62%
Insurance	46%
Real estate	40%
Finance	22%
Personal finance	41%
Legal secretary	12%
Touch shorthand	10%

In addition, such courses as payroll accounting, supermarket operation, marketing research, fashion merchandising, auditing (similar to one of our courses in accounting), public relations, manufacturing processes, cooperative retailing, and fundamentals of record keeping.

Some institutions have wide and varied offerings in the commercial disciplines. Boise, Idaho, offers 14 courses in marketing and retailing; Belleville, Illinois JC, enrolling 3,273 students with a full-time staff of only 44, lists 20 courses in business, not counting the secretarial courses. It is possible some of the courses are not filled with students every term and some may not have been held in two years or longer, but the variety is there from which the

meticulous may choose. Much of the offerings are for their evening or continuing education division for which they have a part-time staff of 138. Several California institutions offer 10 or more courses in real estate.

The 1964 study revealed that Metropolitan Junior College offerings in the Vocational-Technical area were quite limited. While improvements have been made and are being made, a great lag continues. One of the outstanding contributions of MJC is its head start in an aeronautical program--something of which only a few of the other institutions can boast.

The offerings here are so wide and varied, it may be good to list a few:

**Auto Repair (6-10 courses)
Diesel Mechanics (6-12 courses)
*Electronics (12-38 courses)
Machine Shop (up to 17 courses)
*Welding (10-15 courses)
*Electricity (6-12 courses)
*Air Condition'g, Regrig., or heat'g
Plant Engineering (up to 10 courses)
Building Techniques (12-28 courese)
Highway Construction (3-5 courses)
Electrical Technology (up to 31 courses)
Civil Technology (up to 16 courses)
Petroleum Technology (10 courses)
Water Treatment (4 courses)
Cartographic Drafting (5 courses)
Indus. Supervision (8 courses)
Instrumentation (4-6 courses) (control & reliability)
Graphic Arts (up to 15 courses) (printing)
Transportation (4 courses)
Tool & Die Mak'g (15 courses)
Urban Develop't (3 courses)
House Planning (3 courses)
Metallurgy (6 courses)
Traffic Managem't (8 courses)
School Lunch Managem't (5 courses)
Comm. Baking (6 courses)
Comm. Foods (5 courses)

Building Techniques (12-28 courese)
Highway Construction (3-5 courses)
Electrical Technology (up to 31 courses)
Civil Technology (up to 16 courses)
Petroleum Technology (10 courses)
Water Treatment (4 courses)
Cartographic Drafting (5 courses)

Airline Stewardess
Aeronautics (offered by MJC)
Cosmetology (up to 15 courses)
Public Safety (5 courses)
Police Sci. & Adm. (7-22 courses)
(offered by MJC)
Fire Science (5-15 courses)
Library Technician (7 courses)
Personal & Family Living (3 courses)
Medical Office Asst. (9 courses)
Dental Hygiene (18-20 courses)
X-ray Technology (22 courses)
Nursery School (5 courses)

Technical English
Technical Writing
Technical Literature
Technical Mathematics

House Planning (5 courses)
Metallurgy (6 courses)
Traffic Managem't (8 courses)
School Lunch Managem't (5 courses)
Comm. Baking (6 courses)
Comm. Foods (5 courses)

Nursing (15-18 courses)
a. Surgical
b. Obstetrical
c. Practical
d. Care of Aged
e. Care of Newborn
f. Mental Health
(Gen. Nursing offered at MJC)
Charm & Poise
Tailoring
Catering
Consumer Buying
Mortuary Science

Agriculture (up to 23 courses)

**Number of courses apply only to the subject listed and not to the supplemental curriculum required of the student's major.
*Over 50% of the junior/community colleges offer the above vocational-technical subjects. Many offer some kind of nursing education.

One of the best vocational-technical offerings is at Brevard Junior College in Cocoa, Florida. The large California junior/ community colleges tend to follow the same extensive curricula with some selected for specialties in marine science, road construction, and urban problems. Brevard offers 28 courses in electronics. Los Angeles City and Compton Community Colleges have excellent offerings as does Pasadena and even the newer schools such as Cabrillo and San Mateo.

A final look at the offerings in Physical Education which, for want of a better place, was classified in area VI. Just a few of the unique courses are listed below, but some schools (Ceritos College, California) offered as many as 63 courses in Physical Education.

Please note:

Ballroom Dancing
Social Dancing
Personal & Community Health
Recreation (up to 8 courses)
Campcraft & Counseling
Defense Tactics
Judo
Physical Ed. for Elem. Teachers
Elem.School Activities
Skin Diving
Scuba Diving
Water Polo
Wrestling
Slimnastics
Rhythmic Analysis
Canoeing

CONCLUSION

Campcraft & Counseling
Defense Tactics
Judo
Physical Ed. for Elem. Teachers
Elem. School Activities

Rhythmic Analysis
Canoeing

CONCLUSION

This study is not all-inclusive, nor is it a study in depth. It does indicate that other institutions similar to ours list a wide and imaginative variety of offerings. It should act as a kind of stimulant, leading MJC to examine and reexamine itself periodically while asking, "Is it doing the best job for its community?"

To do a little well may be better than trying to do a whole lot half well. But if this is true, it should be debated by department heads and buttressed with substantial facts. It is possible that other agencies or institutions have taken over the training which some institutions feel is necessary; viz., real estate training. But even in this instance, the question might be asked: "Couldn't MJC do the job cheaper and better, perhaps using the same personnel, than is being done at the present?"

Some mention should be made of Developmental Programs. Many schools offer them including subjects as developmental reading, remedial reading, vocabulary building, remedial English, spelling, speed reading, English for the foreign born, plus a bevy of technical

subjects ranging from business communications to technical mathematics. A chart (III) indicates a majority of institutions have some kind of developmental program. Other charts summarize and tabulate material for the reader's convenience.

The study, though not intensive, raises many problems--problems of a positive kind--which might help our institution and our total community in many ways.

Girard T. Bryant, 1968

HARTNELL COLLEGE

156 Homestead Avenue
Salinas, California

PUBLIC

Founding Date 1920

Enrollment 2,729

No. Staff 85
(Part-time 39)

Size and Value of Campus
50 acre Hartnell campus

200 acre east campus for farms and shops

Total Value: $4.5 Million

a. Number of Degrees Offered:
Assoc. of Arts

b. Requirements for Assoc. Degree:
Requirements are varied for different fields. Ex: All depts. - English 1A-1B; 18-25 qrtr. units Foreign Lang.; 14-25 units Nat. Sci; 16-20 units Hum.

c. General requirements for most students; 60 hrs, total - 6 hrs. constit. in U.S.; Amer. hist.; 2 hrs. communications & person. hygiene, 2 hrs. phys. ed. 20 hrs. in chosen field of study

d. Min-Max Student Loads:
15½-17½units max. for 1st sem.
May take 18½ second sem. if have B aver. previous sem.

a. Educational costs (fees, tuition)
No tuition for legal residents of Calif.
$11.00 per unit for non-residents
Adults - $2.00 per course
Act. Fee - $18.00

b. Divisions of Institution:
(At Hartnell there are courses of study, but no distinct divisions)
1. Humanities
2. Agriculture
3. Arts & Science
4. Voc-Tech
5. Health Educ & Phys. Ed.
6. Fine Arts

d. Does the school have a developmental program: NO
They do, however, offer course in orientation - 1 unit

INSTITUTIONAL

LONG BEACH COMMUNITY COLLEGE

4901 East Carson
Long Beach, Calif.

PUBLIC

Founding Date 1927

Enrollment 24,815

No. Staff 279
(Part-time 501)

Size & Value of Campus
104 acres
Valued at $14,787,268

New Business Education Building in 1968

GENERAL INFORMATION

a. Number of degrees offered:
Assoc. In Arts
Assoc. In Science

b. Requirements for Assoc. Degree:
AA-60 hrs total: Eng. Or speech-6 hrs health education-2, phys. ed.-2, soc. sci.-3, human.-3, field concen.-20
AS-60 hrs total: Eng. or speech-6 hrs health educ.-2, phys. ed.-2, soc. sci-3, Amer. hist.-6, field concen.-20
Prof. in math required for both

c. General requirements for most students
Eng., health, hist., nat. sci., phys. ed., poly. sci.

d. Min-Max. student loads:
12-17½ hrs.

SPECIFIC INFORMATION

b. Education costs (fees, tuition)

District	Out District	Out State
FREE	FREE	$11/unit

b. Divisions of Institution:
1. Business
2. Creat. Arts
3. Hist.&Soc. Sci.
4. Lang. Arts
5. Home & Fam. Lvg.
6. Library & Audio-Visual
7. Math & Sci.
8. Nursing & Hlth. Tech.
9. Phys. Educ.
10. Technology

d. Does the school have a developmental or remedial program? YES
Courses: 801 A-B Fund. Skills
809 Penmanship
841 A-B Eng. as a Second Language

e. Transfer deadlines:
Closing date is August 15

f. Grading system & requirements for graduation
